

EW80 *clean*

The special cleaning formula

Particular emphasis was made on its biodegradability, skin and mucous membrane compatibility and surface protection of materials.

Application spectrum: Application spectrum Suits, Jackets, regulators, mouthpieces, breathing masks, protective suits, gloves, hoses and other sensitive materials may easily and thoroughly be cleaned with **EW80 *clean*** before disinfection.

High environmental compatibility

EW80 *clean* is extremely compatible with the environment: It does not contain any hazardous substances and is not subject to classification. Modern surfactants in high concentration without aggressive chemicals allow high dirt- dissolving power with even the lowest concentration. The Only 1 - 2% **EW80-*clean*** solution may be introduced ecologically safe as the active washing agents, according to the OECD screening test, are over 90% degradable.

Value for the Money

EW80 *clean* is effective even when used in a solution of 1%. **100 liters of effective cleaning solution can be made with 1 liter of **EW80 *clean***.**

A small investment for the care of your valuable equipment!

Easy to use

EW80 *clean* is soluble immediately in cold water and may be used: either in an immersion bath for several devices or objects or with a spray bottle. A sponge may be used for hard-to-remove oily stains. After only a few minutes, the disinfection will be completed.

The already cleaned parts should then be thoroughly rinsed in clear water and disinfected according the instructions in combination with **EW80 *des***.

And if you want to make it even more convenient: use our **EW80 *clean*** foam in the washing machine.

Thus you will always be on the hygienically safe side!
